1. POSITION SUMMARY

This role will be leading one of the biggest transformations and change management projects to occur within Orygen, one that will support the realisation of many years of work to create a more appropriate unified mental health system of care for young people and their families.

In this role you will guide the future direction of the changes required, establishing a comprehensive roadmap and project and change management plan that delivers on future state and supports our transformation agenda and equally you will roll up your sleeves to ensure it is effectively delivered. You will be expected to engage the key internal stakeholders in the change process.

In particular, you will be responsible for ensuring the implementation of the success transfer of the staff, funding, resources, infrastructure and assets (including medical records and other sensitive information) for Mental Health services currently provided to young people by Health Networks in the North West of Melbourne. The transfer will be to Orygen or a newly established entity. You will work with the Project Control Group around key stakeholder management.

The project will support the build of a unified Regional Model, providing a comprehensive range of services to young people with mental ill health, including our newly defined Integrated Service Hubs. In addition, you will be responsible for leading the transformation of the business, and the management of additional investment to support Orygen’s implementation of the changes specific to the provision of clinical services as recommended in the Victorian Royal Commission.

2. POSITION CONTEXT

The outcomes of the Royal Commission into the Victorian Mental Health System enable a revolutionary new era of reform in mental health that will at last see youth mental health progress in the direction that we have pioneered together over the past 30 years.

Orygen delivers cutting-edge research, policy development, innovative clinical services, and evidence-based training and education for the mental health workforce to ensure that there is continuous improvement in the treatments and care provided to young people experiencing mental ill-health.
Currently the Company has three Members: The Colonial Foundation, The University of Melbourne and Melbourne Health.

We are a complex organisation. Our workforce is diverse and includes:

- Five headspace centres in Craigieburn, Glenroy, Melton, Sunshine and Werribee that deliver primary clinical services to young people and are operated by Orygen.
- Orygen Specialist Services (formerly referred to as Orygen Youth Health Clinical Program), a tertiary clinical service that is currently operated by NorthWestern Mental Health, co-located with us at Parkville and Sunshine and whilst not under the governance of Orygen, works in close partnership with us.
- The Centre for Youth Mental Health, a University of Melbourne research and teaching department that is wholly seconded into Orygen.
- A knowledge transfer program drawing on Orygen’s research and clinical expertise provides an array of resource and workforce development including providing online and face to face training for the mental health workforce both nationally and internationally.
- A policy think tank drawing on Orygen’s research and clinical expertise and partnering and collaborating with key content experts from Australia and around the world to advise government and other policymakers.
- Centralised professional support functions enabling the organisation to achieve strategic and operational objectives.

This position will work to further strengthen the unification of the above systems, with a specific focus on enabling the delivery of clinical services and the growth to address the needs of young people and families.
