

Research Participation: Identity Expression in Trans and Gender Diverse People

Are you a trans or gender diverse person aged 18+ and living in Australia?

Have you accessed, or do you plan to access, gender affirming medical care (e.g., surgery, hormones)?

We want to know about how trans and gender diverse people express their gender identity through their physical appearance. We are also particularly interested in how gender affirming medical care helps in this expression.

What is involved?

A short survey asking you about how you feel about your body, and a 60 minute interview with a member of our research team asking about the ways you express yourself through your physical appearance, and how you see gender affirming medical care as part of this.

Who is conducting the study?

Ms Renae Brown (she/her) and Dr Joe Doley (they/them) from Victoria University.

How do I find out more or register my interest?

Scan the QR code or email the research team - bodyimage@vu.edu.au to find out more.
