About the role

As a Clinical Trial Coordinator, you will assist Senior Clinical Trial Coordinators, Researchers and Principal Investigators to conduct clinical trials

You will be responsible for undertaking patient assessments as required by protocol, and for the accurate collection and entry of data obtained.

The opportunity exists to be involved with other research, both MRU's investigated initiated clinical research as well as research involving external industry collaborators.

About you

To be successful in this role you will have:

- Tertiary qualifications in Orthoptics, Optometry or relevant health science degree and registration with an appropriate board.
- Excellent clinical ability in Orthoptics/Optometry and ophthalmic assisting with the ability to learn new techniques and procedures.
- Strong interpersonal communications skills, including excellent rapport with patients.

Previous clinical trial research experience will be highly regarded.

Working at CERA

We offer attractive employment benefits including salary packaging (making part of your salary tax-free), flexible working arrangements and family friendly policies. Whilst the work is challenging, you be rewarded by contributing to an organisation that is focused giving people living with eye disease a chance to save their sight.

How to apply

Submit a current resume and covering letter that details your interest and suitability for the role. For more information visit our [Study & Careers](#) page where you can review the position description and submit your application.
