

WEB APPLICATION TESTER/DEVELOPER

- **NFP Salary Packaging options; work/life balance/WFH**
- **Full-time fixed term position for 12months**
- **Leading organisation in youth mental health**

Are you an experienced Web Application Tester/ Developer? Do you want to work with the leading organisation in digital youth mental health? Here's your chance to help make a difference!

About the role and its impact

We are currently seeking applications for a full-time Web Application Tester/Developer. This position is fixed term and available for 12 months with the possibility of renewal dependent on funding.

Based at Parkville, you will initially commence work remotely from home. All applications will be accepted within the state. You must have confidential home office space and reliable internet connection.

As the Web Application Developer, your main responsibility will include testing our Moderated Online Social Therapy (MOST) web platform during its ongoing development to ensure its functionality and smooth operation. This role will support our PHP-based back-end web development, and will also have the opportunity to contribute to other programming tasks and feature development of MOST. You will work with the development team to maintain, test, fix, improve and further develop the MOST system, and will assist in determining decisions made by the development team. Teamwork is the key in working together toward a common vision.

As a guide, remuneration of \$70,000 - \$85,000 per annum is offered, dependent on skills and experience; NFP generous salary sacrificing opportunities are also available to the successful candidate.

Please refer to the Position Description below for the selection criteria and other duties, skills and experience required for this position.

About you

As the Web Application Tester/Developer, you will have:

- Web testing and development experience.
- Proficiency with a scripting language such as PHP and a DB such as MySQL.
- Some familiarity with front-end programming.
- A sound level of professional skill and a good understanding of modern office technologies and practices.
- An understanding of and commitment to software ethics and security issues.
- An ability to problem solve and exercise judgement when performing web development activities and where issues require escalation.

About us

Orygen is the world's leading research and knowledge translation organisation focusing on mental ill-health in young people. Find out more on our [website](#).

Orygen is an equal opportunity employer. We are dedicated to attracting, developing and retaining our staff irrespective of gender identity, ethnicity, sexual orientation, disability and age. Applications are encouraged from all sectors of the community. We strongly encourage applications from the Aboriginal and Torres Strait Islander community.

Orygen is committed to providing an inclusive work environment that supports employees to achieve their career goals without compromising their life goals. With this in mind Orygen offers a range of employment benefits including generous paid leave, flexible work arrangement, access to NFP salary packaging and an employee assistance program.

How to apply:

To apply for this role, please submit your resume, cover letter and a document addressing each essential and desirable bullet point in the Key Selection Criteria which is located in the position description to careers@orygen.org.au, using the subject line: **'Web Application Developer'**, followed by your **'full name'**.

For a private and confidential discussion, please contact Simon D'Alfonso at simon.dalfonso@orygen.org.au.

Closing Date for Applications: **Thursday 24th September 2020, 11:55 PM AEST.**

Orygen reserves the right to close the advertisement before this date is reached. Therefore, it is encouraged that you submit your application as soon as possible.
